TO WHOM IT MAY CONCERN:

I am writing this letter of recommendation for Ms. Rutu Ghatge, who has been working with Armament Research and Development Establishment (ARDE), DRDO from 20th Nov 2024 to 20th May 2025 as a student intern.

I am deeply impressed with her report making, presentation, communication and leadership skills which make me strongly believe that she can be a valued team member of any organization. I would also like to highlight critical projects that she had done with us in Automation & Control Group, where in Rutu's tasks included trying out new approaches for custom CNN for object detection, carried out comparative prediction algorithms analysis evaluation, drone navigation, chatbot development, reporting on the development, doing thorough research, understanding in-depth working of method employed and collaborating with members of the technical team, which ultimately brought forward the best of her knowledge in the project adhering to the timelines.

She's a quick learner & can be exhibited from the fact that within few weeks of joining, she showcased team spirit and co-operative behavior during group tasks assigned to her. Her sincerity and hard-work has culminated into useful outputs. Coming from ISBM College of Engineering in 6th Semester of her B.E. in Artificial Intelligence and Data Science degree, she brought in a rich knowledge of her domain.

On personality front, Rutu impressed us with her open, thoughtful & creative ideas. She is well-spoken intellectual. She has a great passion for her work and an eye for solutions. She has a good scientific temper and innovative mindset towards research activities.

I hereby extend my strong appreciation and reference for Rutu, who is a talented young person driven by her passion for technology and knowledge.
